SUMMARY

Versatile web developer with a background in industrial engineering and a creative flair for coding and design. Made the move from Mexico to California in 2018 to embrace a software engineering career. Excited to join your team to deliver impactful web solutions prioritizing user experience.

WORK EXPERIENCE

Web Developer, Client Success & Operations

Countable, San Francisco, CA | January 2022 – Present

- Reduced site development time by 79%, from 36.8 business days to 7.6 business days.
- Successfully launched over 15 client "impact" sites with meticulous attention to detail and high client satisfaction.
- Translated detailed Figma mocks into pixel-perfect implementations, ensuring precise outcomes.
- Demonstrated expertise in HTML, CSS, and delivering responsive and visually-appealing websites.
- Proactively addressed change requests from clients, providing efficient solutions.
- Supported team members in overcoming challenges and fostering a collaborative work environment.
- Recognized for meeting tight deadlines and exceeding performance expectations.
- Gained exposure to Agile/Scrum methodologies and JavaScript framework
- Initiated and developed a comprehensive Figma template, enabling seamless site creation for the team despite the absence of a dedicated product designer.

Solutions Engineer

Lenos Software, San Francisco | February 2019 - January 2022

- Identified feature requests and documentation gaps, enhancing support quality.
- Developed customized solutions, leading to a 15% increase in customer retention.
- Contributed to daily team meetings and fostered a collaborative work environment.
- Established strong cross-functional relationships with product management, sales and marketing, and engineering.
